*Providing
Extraordinary Care
with Courage
& Conviction*

During these times of uncertainty and continuous change, our Paul Davis Vision remains at the forefront of who we are and what we do. **We provide extraordinary care while serving you in your time of need.** Through courage and conviction, we do the right and good thing when it matters most and when you need it most. To provide a sense of safety and care, our trained and certified technicians are ready, willing and able to respond to biological hazards like COVID-19 to protect your employees and customers with the application of disinfectants and pre-emptive cleaning techniques.

Techniques That Differentiate Us From Traditional Cleaning Methods:

1. ULV Fogging

Pre-emptive cleaning approach that provides coverage for walls, floors, and other horizontal surfaces.

2. Fogging with Horizontal Surface Wiping

All the benefits of fogging with the additional coverage for high touch areas like desks, computers, door and desk handles, and telephone handsets.

3. Fogging with Full Wiping

These are the industry accepted steps when a confirmed case of COVID-19 has been found. This is a full cleaning and application of disinfectants to your facility.
